Addis Ababa, Ethiopia • +251 92 254 5447 • mebrieawoke941@gmail.com
[LinkedIn Profile URL] • [github](#) • [Personal Website/Portfolio]

Results-driven Machine Learning and Generative AI Developer with some years of experience designing, implementing, and deploying scalable AI solutions. Specialized in deep learning, natural language processing, computer vision, and generative models. Proven expertise in building end-to-end ML pipelines, fine-tuning foundation models, and creating innovative AI applications. Passionate about solving complex problems with cutting-edge AI technologies and contributing to impactful projects.

TECHNICAL SKILLS

Machine Learning & AI

- **Generative AI:** GPT architecture, LangChain, LlamaIndex, diffusion models (Stable Diffusion), GANs, VAEs, transformer models
- **Deep Learning:** TensorFlow, PyTorch, Keras, PyTorch Lightning
- **Natural Language Processing:** BERT, RoBERTa, T5, Hugging Face Transformers, NLTK, spaCy
- **Computer Vision:** OpenCV, YOLO, Detectron2, image segmentation, object detection
- **ML Operations:** MLflow, Weights & Biases, DVC, model deployment, monitoring

Programming & Tools

- **Languages:** Python (expert), SQL, R, JavaScript, C++, java,css,HTML
- **Cloud Platforms:** AWS (SageMaker, Bedrock), Google Cloud (Vertex AI), Azure ML
- **Data Engineering:** Pandas, NumPy, Apache Spark, Apache Airflow, Docker, Kubernetes
- **Databases:** PostgreSQL, MongoDB, Redis, vector databases (Pinecone, Weaviate, FAISS)
- **Development:** Git, CI/CD, REST APIs, FastAPI, Flask, Agile/Scrum

PROFESSIONAL EXPERIENCE

- Developed and deployed Medical chatbot, smart music recommendation system, smart farm, job app etc..I serving
- Fine-tuned and optimized large language models (LLMs) including GPT, Llama, and Mistral for specific domain applications, improving accuracy by 50%
- Built end-to-end ML pipeline for Smart Farm
- Implemented retrieval-augmented generation (RAG) systems with vector embeddings, improving contextual accuracy by 70% and more.

- Collaborated with cross-functional teams to integrate AI solutions into production systems
- Conducted A/B testing and model evaluation, achieving high performance improvement in key metrics

EDUCATION

**Bachelors of Degree in Information System | Addis Ababa University |Addis Ababa, Ethiopia
2023 - 2027**

- **Relevant Coursework:** Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Statistical Learning, Data Structures & Algorithms

PROJECTS

****[Project Name]**** | [Personal/Open Source] | [Month Year]

- ****Technologies****: [List key technologies used]
- Developed a [describe AI application] that [describe purpose and impact]
- Implemented [specific technique/model] resulting in [quantifiable outcome]
- [Link to GitHub repository/live demo]

****[Project Name]**** | [Hackathon/Academic] | [Month Year]

- ****Technologies****: [List key technologies used]
- Created [describe solution] addressing [problem statement]
- Achieved [performance metric] on [benchmark dataset]
- [Link to GitHub repository/live demo]

****PUBLICATIONS & PRESENTATIONS****

- ****[Title of Paper]**** | [Conference/Journal Name] | [Year]
[Brief description of contribution]
- ****[Title of Talk/Presentation]**** | [Event Name] | [Year]
[Brief description of topic covered]

****AWARDS & RECOGNITIONS****

- ****[Award Name]**** | [Issuing Organization] | [Year]

- **[Competition Name]** | [Position] | [Year]

LANGUAGES

- **[Language]**: [Proficiency Level]
